Top iPad App - IPad 2 a Copy Cat of iPad?

by Diego Corberto

Article published on December 15th 2011 | Technology

Apple proves that it there is no stop in the world of technology, a year after the iPad was released came the iPad 2. More than 15 million units were sold in its starting week. Many people are looking for the latest upgrades from the iPad that is promised to be shown on the new iPad 2.

iPad 2 is thinner than its predecessor with 33% thinner than its predecessor. iPad 2 has a better processor that has a dual core Apple A5 that is twice faster than the predecessor CPU and also has 9x faster GPU operation. It has a huge difference than the iPad with the faster Web Browsing. Graphic performance has also nine times much powerful than the first that can also allow Java applications with five times faster without any frame lost or anything that makes the process slow.

iPad 2 has a flat back surface that can be placed to anything flat without any worries to shake or rock compared to the first iPad. FaceTime video call that has front and back cameras to make this video calling â€˜up to timeâ€™ or real time video call compare to the first iPad. Three-axis Gyroscope is used to make the video call faster without any delay or slow moving pictures and also you can share any video at the same time. Though little thinner and lighter, it still retain its original 10-hour usage of battery life and has a similar pricing scheme. This wonderful device is available for purchase depending on the stock availability. Since March 11, 2011 the Apple retail stores has grown its sales rate in the United States as well as the United States customers that shops online Apple retail website.

Many applications like the iPad 2 photo booth is also available, with this gadget users can get and amazing use to this gadget by plugging it to your iPad 2 and use your own instrument. Movie editing made easy as it shows, just a click and drag and then some editing will get it work. Sharing of pictures and video can also made easy with the Airplay, it can be use to play app on your TV with the use of Wi-Fi network. Video mirror is also available, just plug it in an HD Tv as a presentation and others can see anything you are doing in your iPad 2 with the connected HD Tv.

iPad Smart Cover is designed for the iPad and actually was being upgraded for the design for iPad 2. With 10 colors and can be attached with magnet that made it sturdy and also it can be easily removed, with 10 colors to choose from. The cover can sense the iPad when it was placed under the unit while at sleep and will automatically wake up when removed. It is made for a comfortable movie watching, game playing and as a web surfing stand.

When iPad 2 is released, many of the users think that it is just a â€˜copy-catâ€™ of iPad but iPad 2 shows the major upgrades and it does not end there. Most applications like FaceTime, faster web browsing and the iPad 2 gives out the best in its use and just the new beginning of the new challenge for the Apple Company.
