Article published on June 19th 2012 | Technology

Whether your business telephone solutions require a voice communication system that is IP server-based or your company needs something that will also accommodate a connection for digital telephones, the combination of Total Communication Services excellent support and Toshiba's great products will provide the IP communication solutions for you.

Total Communication Services has proven itself as a reliable and cost effective provider of a comprehensive array of telephone system services including installation, training, support and system analysis. As the only company in Canada to be a seven-time winner of the MasterService award for outstanding customer service and customer satisfaction, Total Communication Services small business IP communication solutions are second to none, regardless of your company's size.

Toshiba offers products that enable your company to find a unified solution with an enterprise-wide telephone system. Their award winning IP telephone solutions include VoIP phone systems, Voice over Internet Protocol technologies that reduce costs by allowing you to make your telephone calls over the internet or on your company's own private IP network.

Internet telephone isn't a new technology, however it has recently become known as a very reliable service and a serious option for business. Total Communication Services will work closely with you to discover the specific business VoIP phone system that will prove be be more reliable than your mobile phone or landline calls.

Some of the features of the Toshiba IP telephone solutions include conference calling capabilities, desk to desk calling, music on hold and automated attendants as well as many other sophisticated communication features that can be customized to suite what's best for your business. Installing small business VoIP solutions is not only about replacing your existing telephone system, it is also an opportunity to add these great features and improve the quality of your communication system while reducing your costs. Toshiba IP business telephone systems will eliminate your long distance charges between branches or to national and international clients. The IP communication solutions will also provide telephone service to your remote locations using your current wireless internet service, replacing the expense of mobile phone cellular service.

In addition to meeting your IP communication needs, our solutions include all the digital and IP telephones that you will need as well as the software updates, warranty and service terms that you choose depending on the best VoIP business solutions for your business. What's better is that Total Communication Services and Toshiba IP Business Telephone Solutions will provide all of this without the ongoing costs of support you usually find associated with a business telephone system.

At Total Communication Services, we pride ourselves on our ability to provide fully customized solutions because we work closely with all of our valuable customers to fully understand your needs. And we will develop a forward looking plan with you in a close working relationship to ensure that your IP communication solutions continue to serve your business for many years into the future.
