Article published on December 28th 2011 | Technology

Winter mornings cannot be defined in a few words. After all, it is that time of the year when people love to dress in best of the best attire. However, what chilly winds leave you shivering. No matter where you are, you look forward to evenings returning home and spend quality time with family. People often opt for traditional fireplaces in comparison to modern fireplaces. If you are someone who believes in Go-Green mantra then bioethanol fireplaces are the way to go. They do not only warm your home but also pacify ambience of every room. These fireplaces have become an integral part of present day homes.

Contemporary fireplaces are designed in different patterns and colours. You can select the one depending on your budget and size of your room. A conventional wood burning fireplace can be easily converted into contemporary fireplace fuelled by electricity, propane or gas. Environmental friendly fireplaces ignited by bio-ethanol have been a popular pick amongst citizens of cold regions of the world. Ignited by Bioethanol, such fireplaces do not leave any emissions polluting atmosphere around you. These modern day fireplaces generate heat along with steam and water vapor. This, in turn, eradicates the requirement of a flue or ventilation shaft. Futuristic design and technically advanced features make up for a perfect fireplace.

Ethanol is also known by various other names like "grain alcohol" or "ethyl alcohol". Ethanol used in contemporary fireplaces is the inconsumable ethanol that is denatured. It is formed only after addition of a few chemicals, hence, making it odorless, non-polluting and eco-friendly. Whether you are renovating your home or constructing a new one, installing such fireplaces is the best way to let your home get an entirely new look. Installing them is the sure shot way to ensure the safety of your near and dear ones.

Burned using the above slated denatured alcohol, ethanol fireplaces are portable, and thus can be installed anywhere. You can place them even in your kid's room as it requires no chimney. Neither have you to worry about creating chimneys nor about getting them blocked. Moreover, cheminee Bio-ethanol are easy to maintain and use. You no more have to worry about ashes or burnt logs, fear of falling embers and cleaning them.

It can be renewed from natural resources and plants like sugar beets and cereals amongst others or biomass. Cellulosic form of ethanol is made from husks and stalks; however it still undergoes the fermentation process.

These fireplaces are designed by experts who keep in mind the environment, health and decorative factors. Moreover, bioethanol fireplaces are available at pocket friendly price which means you don't have to shell out extra bucks to warm your home. So, let winters be your friend this season.
