Article published on March 1st 2012 | Technology

Since the day iPhone 4 was launched in the market, more and more people are buying them and hence, the mobile phone cases producers have started making different types of cases for iPhone 4 which are also selling like hot cakes in the market. In this regard, quickly have a look at the different types of materials used for making iphone 4s cases.

â€¢ IPhone 4s Cover made of Silicone: These rubber cases are ideal for people who have lots of outdoor activities. iphone 4s case made of silicone provides a stronger grip and hence, prevents your phone from falling down.

â€¢ iPhone 4s Case made of Metal: Many people prefer using metallic iPhone 4s cases. Being strong and durable, these iPhone 4s cases are ideal for people who have the habit of dropping things accidentally.

â€¢ IPhone 4s Cover made of Polycarbonate: This type of iPhone 4s cover is suitable in temperature changing places.

â€¢ iPhone 4s Case made of Leather: These varieties of iPhone 4s cases are considered to be the most expensive among the other varieties available. However, you should buy those cases which are made of genuine leather so as to provide greater protection to your phone.

â€¢ iPhone 4s Case made of Carbon Fiber: These cases are lighter in weight and are available in a wide range of designs and styles. However, though the weight of this type of case is somewhat lighter than the other varieties available, yet it helps in protecting the entire body of the phone from scratches.

These are some of the popular varieties of iPhone 4s cases that are available in the market today.
