Article published on April 27th 2012 | Technology

Want to enjoy online privacy, security and freedom? VyprVPN is ready to add spice to your online experience with its advanced features that lets you to enjoy your online world without any restrictions. Golden Frog, a leading developer of software and services didnâ€™t invent VPN, but slightly optimized VyprVPN for todayâ€™s broadband connections.

Since, Golden Frog has its own servers and manages its own network; it doesnâ€™t rely on third parties unlike other VPN providers. It is also able to offer fastest VPN speeds in the world and ensures end-to-end privacy of the user. There are several other features that sets Golden Frog VPN provider apart from other hosted VPN providers such as unlimited IP addresses, VPN speed, VPN usage and Server switching, NAT firewall, encryption up to 256 bit encryption and much more.

VyprVPNâ€™s advanced security and privacy features help users to protect their online privacy. Usually, VPN creates a secure internet connection and encrypts the data. When you start to use VPN networks, your internet provider views only your encrypted data and final destination views only your VyprVPN location and IP information.

Some important features of VyprVPN are listed below:

Enhanced privacy features:

VyprVPN offers a wide range of privacy features that lets you to protect your online activity from third parties, defeats ISP deep packet inspection, prevents Geo-targeting and location identification and secures your IP address. You can even utilize its discreet business intelligence for business purpose.

High level security features:

Using VyprVPN, you can create a secure internet connection from anywhere. You can even use your iPhone, iPad or Android devices to create such secure internet paths for your online protection. Using its high level security features, you can protect your personal emails and instant message communications, secure your internet connection on public Wi-Fi hotspots and prevent data sniffers from accessing your private information. With its advanced features, you can even secure your confidential or work-related emails or data on your mobile device.

Fast and reliable internet connection:

Usually, other VPN providers rely on third parties for VPN speed, but Golden Frog writes 100% of its VPN server software, manages its own network and hardware. Since, it completely manages the overall works it is able to offer the fastest VPN speeds in the world.

These are some important features that can add spice to your online experience.

Golden Frog also offers a free VyprVPN App with every account. Golden Frog provides VyprVPN in tow different packages namely VyprVPN Pro and VyprVPN. Users can choose the best package according to their expectation and budget. In addition, Golden Frog also offers a 7 day money back guarantee.
