Article published on March 30th 2012 | Travel

Search engine optimization (SEO) is the process of improving the volume or quality of traffic to a web site from search engines via "natural" search results. Typically, the earlier a siteâ€™s pages or products appear in the search results list, the more visitors it will receive from the search engine.

The following outline the types of activities that are undertaken to improve a websiteâ€™s ranking under the selected keywords and phrases to improve the websiteâ€™s SEO ranking when selected keywords and phrases are searched online:

1 SEO website - Onsite SEO work and SEO research activities

2 SEO Company Competitor Analysis â€“ SEO based Analysis of your top competitors for their primary keywords. Also includes competitor traffic estimation, inbound SEO link competition, search engine saturation and SEO methodology.

3 SE O Keyword Research & Analysis â€“ A study of keywords and phrases based on search volume averages.

4 Title, Meta, & Alt Tag Creation â€“ Developing tagging elements throughout your websiteâ€™s code bas on the SEO keywords and phrases you want to rank for.

5 URL Optimization - Developing keyword rich URLs related to your website.

6 XML Sitemap - Creating an XML sitemap format that can be submitted to search engines to help them understand and index your website efficiently to improve your SEO rankings.
