Article published on April 21st 2012 | Travel

San Francisco is a popular tourist destination with all the unique sights and sounds within reach in that area. The city has always been a popular vacation destination but even in San Francisco, things can quickly go from great to horrid with bad accommodations.

Nothing spoils a San Francisco trip more than poor service so before blindly booking on just any random motel or hotels in the area make sure you do your research. Some hotels have alarmingly high hotel rates despite having less than preferable services. You can first ask around, assuming you know someone from San Francisco, if they know of any cheap hotels in the area that offers decent accommodations. It does not necessarily have to be a five star hotel since you are on a budget but it has to be cleanâ€"i.e. no befouled or begrimed bed spreads.

You should also consider the location of the hotels. The closer a hotel is to a popular San Francisco tourist attraction, the more likely that hotel might jack up its prices. There are hotels that are near those popular attractions but not as expensive as the ones located on the site itself.

If you plan on booking a cheap hotel San Francisco visitors can afford, your best bet would have to be brand-named hotels, which over the years have developed for themselves a reputation for lower rates. The hotel industry, on the other hand, has several affiliates that offer low cost variations among hotel branches and their partners. These hotels usually offer special packages that no San Francisco tourist should miss. If you need to be sure about rate offerings, you may want to double check on websites that offer hotel reviews.

There are several websites that offer unbiased reviews of affordable hotels in San Francisco. You can read up and check them out so you can make an informed decision. By doing your research, it takes the hassle off worrying that your accommodations might turn out quite substandard.

San Francisco cheap hotels are actually not very hard to come by as long as you take the necessary steps in booking the right one. Brand named cheap hotelsâ€"i.e. the ones found across the countryâ€"are usually a safe bet in acquiring decent accommodations and reasonable rates.
