Article published on February 9th 2012 | Travel

Due to the incessant increases in hotel rates these days, travelers frequently face the challenge of looking for hotel accommodations that wonâ€™t deplete the dollars in their pocket. This could rather be an ordeal for first timers, but not really for wise travelers.

Read Reviews

A wise traveler will not carry his suitcase and march into the first hotel that comes his way. What he usually does is take time to read hotel deal brochures or sit in front of the computer to search for the latest hotel bargains. Most travelers shop online for affordable hotel accommodation rates and compare the amenities offered. Aside from checking the websites of your favorite hotel, browsing on general booking sites may also help you find the hotel worthy of your travel savings.

Consider Package Deals

Some hotel accommodations are offered in package deals. This means the rates that you need to pay while staying in the hotel is combined with other services you may need such as transportation, tour guides, and extra amenities. Compared with package deals, booking your lodging separately can be more expensive and time consuming. Check the average rates of package deals and discounts offered by any cheap hotel San Francisco has.

Be Flexible with Travel Dates

Travelers who are flexible when it comes to travel dates are most likely going to find the best deals offered in affordable hotels in San Francisco. One reason for this is that hotel rates depend on the season and time of the week you travel. Hotels that cater to people on a business trip tend to offer lower rates during the weekend, while those that cater to regular tourists usually offer lower rates during weekdays.

Use Coupons and Vouchers

If you donâ€™t have the power of negotiation when it comes to accommodation rates, you can still stay in that cozy hotel of your choice without paying in full. This is made possible by discount coupons and vouchers that you can cut out, tear off, download, print out or simply mention over the telephone when you book your accommodation. Collect as many as you can and try to use them on your next vacation in any cheap hotel San Francisco has.

Last Minute Deals Can Be Advantageous

Some travelers choose to wait until the last minute before they book for their accommodation. They wait for cancelled reservations. Most hotels in downtown San Francisco tend to lower their rates to fill remaining vacant rooms, offering last minute deals to those who are willing to push their luck.
