Types of Transportation Services in NYC by Christina Kevin

Article published on May 29th 2012 | Travel

The world is full of places that are worth spending vacations especially some destinations that offer superior facilities and attractions for the tourists. Among those hot spots around the world, New York City is a place which is one of the dream lands for the international tourists. It is known as a city that never sleeps due to its lively roads and traffic that runs 24/7/365. The iconic city offers just about too much for fun. The possibilities of enjoying your day or vacation out at the New York City are limitless. It is the metropolitan capital of United States and is known as the most favorite location for special events and occasions. The city offers too much for just about any kind of visitors. The heavenly skyscrapers give the feeling of a sheer technology and style. Glamour and fashion are the landmarks of the city of New York. The city of New York offers a great range of attractions which include amusement parks, theme parks, bars, pubs, clubs, cafes, hotels and most of all transportation facilities. The city of New York offers many different modes of transportation that include:

Limo Services

The people who are fond of traveling in luxury and style and can afford just about anything for their comfort and luxury, usually hire chauffeur driven limousines which are known as one of the symbols of the skyscraper city of New York. There are a wide number of limousine hire companies around the city that offer different limousine hire packages, each designed to cater the needs of a respective customer. Limousines are the symbol of status and wealth. They are hired be corporate businessmen or wealthy individuals or families. Limousines provide matchless facilities and cannot be compared with any ordinary means of transportation. The most popular of all limousines are the stretched limousines. They are not only most expensive cars but also the most luxurious. A stretched limousine features amenities such as tinted windows, leather seats, plush interior, flat screen TV, CD/DVD player, iPod connector, temperature control, privacy divider, fiber optic mood lighting, marbled floor and a fully stocked bar.

Cheap SUV Services

SUVs which are also called Sport Utility Vehicles are the special vehicles which are designed for smaller groups or families. They are also very expensive vehicles but way less than the stretched limousines. The SUV vehicles usually have a comfortable seating capacity of around 5 to 8 passengers depending on the model and make of the SUV vehicle. The most popular of all SUVs include Chevy Suburban, GMC Yukon XL and Cadillac Escalade. They also contain extraordinary features and facilities that include extra luggage space, satellite radio, CD/DVD player, 8 inches LCD, temperature control system, power sunroof, wireless headphones and a lot more.

Cheap Van Services

There are many transportation companies around the city of New York that offer cheap yet luxury van services which are designed for people traveling in the form of groups or large families. The vans may be ordinary or luxury limo vans. The families prefer traveling in luxury limo vans due to the facilities and amenities they provide. The most popular of all luxury vans is the Ford E-350 van. It is a luxury van with a comfortable seating capacity of up to 14 passengers. This van is the best choice for corporate events, weddings, airport group transfers and family outings. For families or groups that are more than a total of 14 passengers can also avail cheap bus services in New York.
