Waterproof jackets can be weather proof too

by John Kumar

Article published on December 17th 2011 | Travel

Waterproof Jackets are of many types and fashions. In fact, in winter y weather when there is a need to protect oneself from the unfriendly elements of nature, waterproof jackets have to be used over all your day clothes.

Unfortunately for the fashion conscious, their fashionable attire is hidden by this and so now, waterproof jackets can also be fashionable and make a style statement for the persons who don them.

Menâ€™s Waterproof Jackets

Menâ€™s Waterproof Jackets come in different materials, different lengths and different styles depending upon the requirement. In really wet weather, the water-proofing is the most important quality required and the outermost layer is made of synthetic material that is water proof or leather that is cured to make it water proof. The length of Menâ€™s waterproof jackets also depends upon the amount of rainfall and temperature in the area that they are to be used. The wetter or colder it is the length becomes more. There can be a hood to protect the head from rain, wind and snow. The insulation layer beneath the waterproof layer of Menâ€™s Waterproof Jackets also depends upon where it has to be used and the lining whether it needs to warm fleece or wool or a fashionable satin depends totally upon the same; likely weather conditions.

Ladies Waterproof Jackets

Ladies Waterproof Jackets are also fashionable along with being useful to protect against wet and cold climate. Available in many colors, styles and materials, Ladies Waterproof jackets can make style statements about the user. Like Mens waterproof jackets, ladies waterproof jackets also have three to four layers. The outermost waterproof layer is made of different types of waterproof materials or even leather that has been made completely waterproof by chemical treatment. Fashionable colors and styles are of this layer. Embellishments such as buttons, zips, contrast strips, pockets, belts, collars are all part of this outermost layer. The layer under this is usually the insulation layer. The thickness and quality of this layer can vary depending upon where these ladies waterproof jackets will be used. Colder climates might need thicker insulation of better material than if these jackets are for wetter more tropical or subtropical climes. There is usually a warm inside layer too for really colder climates that can be made of fleece or wool and of satin or silk for not-so cold weathers.

It can be said that basically whether there are kidâ€™s waterproof jackets or menâ€™s or even womenâ€ waterproof jackets. They are all the same except for the size and the cut. With men and women wearing almost the same kind of clothes, it is hardly surprising to see that styling for both is also very similar.
