Rail

Rail is one of the best ways to travel to and from Seoul Incheon Airport. The Incheon International Airport Railroad is an express station located in the Transportation Centre in the airport. The Transportation Centre is located right next to the main terminal building. It can offer high-speed service to Seoul, with the AREX trains hitting top speeds of 120 km/h. It takes 43 minutes by the fastest train service to go from Incheon to Seoul. The slower commuter trains make more stops, but only take slightly longer to get to Seoul, clocking in at 53 minutes. The commuter trains also show up more regularly, every six minutes, than the express trains.

Taxi

For those who do not have their own car at the airport, there are plenty of taxis ready and eager to take passengers. Taxis in Seoul will be either white or black. Normal taxis are white or yellow with a plastic taxi cap on top of the car, while deluxe taxis are black with gold accents. They still have the plastic yellow taxi cap at the top of the car, but are a bit more expensive than regular taxis.

Ferry

There is also a ferry service that runs between Yeongjong-do and the mainland. The dock is a bit far from the airport, so travellers will need separate transportation to get to it.

Seoul Hotels

Looking for hotels in Seoul Airport? Directrooms.com can offer deals on some of the best rooms in Seoul Airport, for travellers who want to stay there during their trip.
