Smart Mobile Apps Make Air Travel Delightful

by Shally Smith

Article published on November 28th 2011 | Travel Tips

Air travel is undoubtedly the most convenient means of travel. However, it also has its fare share of drawbacks like flight delays, luggage issues etc. Fortunately, mobile technology has hugely helped to improve the services of aviation industry. In the recent times, there has been a spate of mobile application launches, which has helped travelers to search and book airline tickets, get updates about flight status, mobile check-in, know about seating status and get information on airport car parking on the go.

With the aim of offering passengers easy access to important information about flights and amenities, several airports have started offering their own apps and mobile versions of their websites. Read on to know about some apps that can be used while traveling to or through some major airports for enjoyable flying experience.

Mobile apps â€“ Heathrow International Airport

Tourists taking cheap ticket to or from the UK can benefit from Heathrow mobile application. This wonderful mobile application offers all the vital information like travel planning tools, terminal information, travel news, special offers etc. Some of the eminent features of this user-friendly application are:

â€¢ Getting Live flight Updates

â€¢ Booking long stay car parking

â€¢ Viewing the latest airport security guide

â€¢ Getting mobile-friendly interactive terminal maps

â€¢ Seeing full shop and restaurant listings

â€¢ Weather and City guides

â€¢ Journey planner to and from the airport

â€¢ Flight timetables for every airline at Heathrow

Mobile apps â€“ Pittsburgh International Airport

Travellers buying cheap tickets to or through Pittsburgh International Airport can use the mobile website application to make their travel more convenient. This application works on any internet enabled mobile device. This comprehensible application helps to check the flight status (arrival and departure status), compare air fares, get the car parking rates and know about the ongoing promotions at the airport. Additionally, there is a unique feedback feature that allows users to submit inputs to improve the services at the airport.

â€¢ Getting Live flight Updates

â€¢ Car parking rates

â€¢ Fare comparability feature

â€¢ Promotions and schemes

â€¢ Feedback

Mobile apps â€“ Sydney International Airport

Tourists taking flight tickets to or from Sydney International Airport can take advantage of a wonderful mobile application that helps to ensure hassle free journey. This superb application allows users to track flights from and to Sydney International airport. Additionally, this application can be used to receive â€˜Push Notificationsâ€™ which enhances the chances of finding cheap flights and getting timely flight status alerts. Here is list of the most prominent features of this application.

â€¢ Tracking flight status (delayed, early, boarding etc.)

â€¢ Tracking the actual arrival and departure times

â€¢ Getting information about the terminal used for a flight (if applicable)
