Acrylic Art- the Real Choice of Artists by [Julia Roger](#)

Article published on March 13th 2012 | [Visual Arts](#)

Acrylic is a paint, which is composed of the synthetic resin material. This art has a liquid medium that binds the colored pigments rather than oils. This Acrylic Art dries faster than the oil paint and is soluble in water. If we go into the history of Acrylics art, they were first produced around the nineteenth century in Germany. Although, this art fully emerged in the year 1950, this painting is a new addition to the various new paintings that are available in the market. From the year 1950 itself, Acrylic print has been continuously under the development stage.

This print of Acrylic is on huge demand and highly favored among artists because of its better features and versatility. This painting is having a watercolor text. The other feature of this type of Acrylic print is the permanent behavior of the paint. This type of painting is not susceptible and it does not lose its fade as the time passes on. This type of print is free from cracking and does not lose its color.

This art is much easier than any other art due to the use of Acrylic Art. There are many characteristics of these arts. Some of the important property of this art is that it has a fast drying time. This paint dries quickly so that other colors can be applied along with such oil painting. Some other features are responsible for quick drying of Acrylic paints as if they remain workable for a very long span of time.

The fast drying time of Acrylics can also damage brushes if they are not cleaned within a particular span of time. This paint cannot be used for direct painting of outdoors, especially if it is a bright sunny day. These paints dry very quickly and it can create problems if we consider of painting after a long span of time. This paint also works well as a transparent medium and similar to that of a watercolor. Acrylic does not have a problem with water and thin washes can be performed without thinking of losing of the color.
