Better talks at cheaper prices! by Miles Samaratne

Article published on August 23rd 2012 | VOIP

Each one of us knows someone who lives in another country, but it's usually hard to call them, as the call rates are just way too towering. If you look hard enough and long enough, you will surely find ways to call your friends or family members in another country without spending too much money. Say, for example, you have friends in Iran, and now, it is really possible to make cheap calls to Iran.

With the arrival of internet technology, making cheap calls to Sri Lanka and cheap calls to Algeria is now simple, quick and affordable. Now, people around the world call other places at cheap rates. A technology that allows you to make cheap calls over the Internet is VoIP or Voice over Internet Protocol.

VoIP telephony has gained gigantic popularity amidst the callers all around the globe. Now, it has become possible to stay connected with your kith and kin without paying huge sums of money on phone calls. Further, VoIP calls have also surpassed the regular phone calls with their extremely cheap rates and surprising voice quality.

Calling from your landline to another country is cheaper than calling from your mobile phone. So, consider this when you are making an international call. You can call any person, who holds a mobile phone or a fixed line phone. VoIP calls can be made with your laptop, PC or Smartphone. However, you can't make these calls until and unless your device is VoIP activated.

For activating the VoIP telephony on your gadget, you can go for VoIP service providers present in the form of online sites and activate your gadget with VoIP. For this, you will have to get online registration after providing a little information. Then, the company will send you a password and user name to open your online account. Then you will have to buy a calling plan from the company.

The market is flooded with numerous home account service providers, and you can open an account just by registering your details and then topping up by a credit card. They provide a couple of numbers i.e. 0208 & 0800 for this service to all our customers. Plus, you can also obtain real time information like account balance, call rate etc.
