Article published on June 14th 2012 | VOIP

money if you went more than 2 GB. In addition, Verizon Wireless joined by an additional charge is more than 2 GB. Why, you ask? Simple services like Pandora, that offer streaming music and Netflix, which offers streaming movies and shows, people have been overusing their data plans to download these services. It was released the tension on their data networks.

So you might ask, just what is left to offer unlimited data? As far as post paid carriers go, only T-Mobile and Sprint offers unlimited data on their unlimited plans. However, T-Mobile wireless Internet slows down your phone, 2 GB, allow you to use the streaming service, you'll love then, when you use your quick gigabytes.

So what can you do? The first thing you need to do is link your phone to your wireless internet connection at home. This will prevent the use of no more than two gigabytes, so fast and will allow you to use your phone service that you want to use. You will not spend $ 200 to $ 300 on your new 4.3-inch screen with a super fast processor for nothing. If you do not currently have wireless Internet access at home, that is ok. You can go out and buy a wireless router for under $ 50, which will allow you to do so. You will also want to use to program the phone to their friends and families of wireless networks in your home.

If you do not want to do this, there is a postpaid carrier, offers truly unlimited left a mobile phone plans. Sprint has two plans, which will give you unlimited data without slowing you down. The first plan is the highly touted to any mobile at any time plan to $ 69.99 per month or $ 79.99 if you use a fully featured phone. With this proposal, you get unlimited calls to any mobile phone in the country will also get unlimited text and unlimited data use of the Internet or e-mail. The second plan Sprint offers a $ 99.99 per month if their Simply Everything plan.

You can go out and buy a wireless router for under $ 50, which will allow you to do so. You will also want to use to program the phone to their friends and families of wireless networks in your home.

If you do not want to sign a contract, there are several pre-paid or pay as you go plans. The downside to pay as you go plans, you have to buy a phone to go with your plan. In addition, you do not get the latest and greatest cell phone technology. Instead you technology that is generations old. However, you have a Sprint phone as a cool carrier with a contract and pay as you go plans, most of which use the Sprint network.
