Article published on February 27th 2012 | Web Design

Customers are one of the integral parts of any business. If a company maintains strong trust and mutual understanding with the customers then, it is surely going to bring in new business and success. So, it is very important to be in contact with your customers to know about their requirement and feedback of your previous services. And when itâ€™s time for communicating with all your customers, there could be nothing better than the email. It is one of the most effective and efficient way to communicate with your clients. Whatever is your business size you canâ€™t ignore the importance of the email. If a user ask you about certain product, it becomes inevitable to communicate with him. It is email marketing comes into the light. You can use emails to tell your customers about the product, services, costs, new offers, upcoming products, upgrades, and changing policies etc. the list could be endless or you could simply use it to run a rigorous campaign to support your business.

There are many traditional email client available in the market like yahoo, Gmail, AOL, rediff, thunderbird, lotus mail, windows live mail, etc. but it is possible that you may evidently will bump up while sending some greetings, broachers, etc. to your customers. In general all these traditional email clients possess few CSS restrictions which donâ€™t allows you to go smoothly with your email campaign. So, it is always advisable to design your emails including greetings, broachers etc. by using Photoshop and then convert them to CSS or HTML. Here we have to make sure that the email is visible on all browsers so, PSD to HTML email conversion is very important.

This allows you to create highly animated and visually appealing version of your simple Photoshop email and newsletters, that certain to attract the clients. It is always good for your business to send visually appealing animated, dynamic and web compatible version of your PSD files, these are much certain to attract a majority of the customers that the simple text mail. Also the PSD to Email converted emails downloads much faster than the regular newsletters. Easy downloading of the emails, increases the SEO of the email and thus your campaign, hence your campaign would be much preferred by search engines. And also your customers will be able to access it with any browser.

So, the thing is PSD to CSS/email template transfer helps you to establish an effective email communication with the clients. The interaction with the customers is very important to attract costumer to increase their business, get new order, and invite new business. Hence, one can never compromise with the importance of the PSD to email conversion for attracting customers and new business.

A PSD to email service provider can provide you with the quality services at affordable prices. Time taken is also very less, testing team from the service provider will also ensure that, your email is compatible with all browsers. Today people access emails from different gadgets ranging from mobile phones, iPad, iPhone, and tablets to notebook PCs. So, the email should be compatible with all these devices along with the cross browser compatibility. This requires a lot of technical knowhow. There are many companies which can provide effective PSD to XHTML/Email Conversion at affordable prices.
