Hire Joomla developer & Experience the competence of this Open Source Platform
by Marshal

Article published on March 26th 2012 | Web Design

A content management system or CMS makes the maneuvering of a website easy and simple. It is the focal page which allows publishing, editing and modification of content on the website. CMS is a valuable asset to the website as it provides much needed data and information which enables sound functioning of the website. Joomla CMS is another feather in the cap of the open source piece of online software. Segment of the Mambo system, Joomla came into existence in 2006and right now is estimated to be the second widely used CMS on the internet just beneath another open source system, WordPress. Having won the Packt Publishing Open source Content Management system award in 2006, 2007 and 2011, Joomla is considered as a valuable addition to World Wide Web space, gravely contributing towards the need to hire Joomla Developer by varied companies across the globe.

Joomla is apt for any kind of website irrespective of its complexity and extensiveness. A wide variety of website namely educational, personal websites, community portals, corporate websites, Non-Profit Organization Portals are propelled by Joomla CMS. Joomla is backed by a huge community of developers. If you are worried that it would be difficult to find efficient Joomla developers, then put your mind to rest. Due to the popularity of CMS system across the globe the opportunity to hire Joomla Developers with expertise in the Joomla platform is quite high.

To integrate Joomla on to ones portal, it is imperative to have a through understanding of this Open source system. The information that gives insight into the technicalities of the Joomla CMScan be quite handy particularly at the time of screening and eventually getting down to hire Joomla Developers for the project.

One of the prominent features of Joomla Open source system is the ease with which its core functionality may be expanded by installing â€œExtensionsâ€•. A Professional Joomla Developer can efficiently fit and find the exact Extensions and Modules in compliance to the need of the website. Working with Joomala CMS post development is easy and fast. It makes code updates and content management easy. To handle Joomla CMS it is not mandatory to hire a Joomla developer that is proficient with programming and coding. This particular aspect helps companies/people save a whole lot of money. Even a non technical person can seamlessly add new pages, edit exiting pages, build links for the new pages, and upload images on the web.

One of the many requirements of the corporate web pages is the need to change the appearance of their website quite frequently. Joomla CMS gives the liberty to operations manager of Content Management System to change the UI of the website with a click by integrating changes in the template. In Practice Joomla is the best CMS for small business enterprise since the cost involved in the maintenance and up-gradation of the website is next to negligible. Joomla is a highly scalable, easy to use and manage CMS, but is greatly regarded to be not so Search Engine Friendly. In order to take care of the flip side of the Joomla CMS, an SEO expert may be consulted who has the competence to increase the ranking of the website. Therefore, hire Joomla Developer today to build you the most robust powerful CMS, which can add value to your website.
