Pink Hand Technologies Pvt Ltd (PHT) offers a range of Microsoft .Net services. We are a leading .NET application development, company catering to the .NET development needs of customers across the globe.

ASP.NET makes building real world Web Applications dramatically much faster & easier. ASP.NET provides for latest web application development that helps web developers create everything from personal web sites to large, enterprise-class dynamic web applications. .NET developers can quickly build more efficient and interactive web experiences that run across most popular web browsers making use of Microsoft's AJAX framework - ASP.NET AJAX.

We possess the experience and the expertise to support the potential of the latest Microsoft .Net technologies, tools and development solutions. Our years of experience of managing and developing a wide range of .Net projects have given us an advantage of understanding and customized software products and web applications using the popular Microsoft .Net frameworks. We expertise in Social Networking portals, Job portals, ecommerce websites, Professional Networking portals, Web 2.0 portals and other similar web applications developed with latest standards and following modern design trends.

Our .Net development team has the desired exposure of working on a wide range of .Net Applications capitalizing the benefits of the latest .Net technologies and products to yield intelligent software solutions.ASP.NET makes building real world Web Applications dramatically much faster & easier. Even though the name ASP.NET takes the name from Microsoftâ€™s old web development technology, ASP, the two differs significantly.

ASP.NET reduces the amount of code drastically to build large applications... With built-in Windows authentication and per-application configuration, the applications developed in ASP.NET are safe and secured. ASP.NET provides better performance by taking advantage of early binding, just-in-time compilation, native optimization, and caching services. ASP.NET purely server-side technology so, ASP.NET code executes on the server before it is sent to the browsers.

Having great exposure in VB.net, C#, SharePoint, MVC 4, Asp.net, AJAX, WPF, SQL Server, Oracle, MySQL and in .Net framework we guarantee to meet all the requirements. Our dot Net development teamâ€™s exposure to varied technologies.

Pink Hand Technologies Pvt Ltd provides .NET developers with Excellent Communication skills to minimize the delays in the project communication process. Pink Hand Technologies Pvt Ltd offshore .NET developer will be available to the clients as per the project needs Viz, Partime, Fulltime or even specific to a project. Client has access to the offshore .NET developer directly during the development process and can extract best skills. We assure 100% efficiency through our highly caliber team and also with the proven methodologies .We help businesses to deliver unprecedented levels of value to their customers, partners and employees through our Designing and Programming services using .NET.
