Outsourcing your Web Design Company? Top Countries to Outsource by [Glenda Himes](#)

Article published on February 14th 2012 | [Web Design](#)

American businessmen today, most significantly people who find themselves into IT is familiar with the high demand that the service is approaching. Everyone knows that United States is among the strongest countries in the whole world. Many jobs have been created thru the years, due to the high demand of different products and services. Some established and start up companies in the United States seeks to get more earnings than what they are receiving right now, so they thought of a and they came up with the idea of outsourcing.

Outsourcing a company means all functions, tasks and paper works will be sent out to the folks you assigned to work for you in another country. The practice of outsourcing might take you a maximum of 6 months to process all legal papers and to find the workplace you will be putting your business in.

Why do businessmen outsource their Phoenix web design company?

1. Low wages
2. Favorable tax rates
3. Quality of work is more than or similar to the quality of work provided by the locals.
4. Increased company profit

Now that you have an understanding of the reasons driving the outsourcing movement, here is the list of the countries where American businessmen like to place or outsource their companies.

First up! India.

Second to the US, India is also identified for being the world's greatest IT masters. India's present population is 1.1billion. Waves & tax rates are more affordable and the quality of IT services are the reasons why businessmen like to outsource their businesses. Top brands like Hewlett-Packard have outsourced in India.

China

China is known to have the world's largest population, a total of 1.3billion and still running. Reasons why businessmen choose to outsource their companies in China includes low wages and good academic system. IT Companies like IBM and Accenture have contracted their IT/BPO businesses in China.

Malaysia

Another Asian nation on our list, Malaysia. It has about 23 million in population and the reasons why businessmen choose Malaysia is due to low costs, low compensation packages, advanced level of integration and strong government support. IBM has outsourced their offices here, as well as Motorola.

Czech Republic

We frequently hear outsourced businesses in Czech Republic, but do you know that offshore services market in this nation is greater than 10% annually and is still growing. Competitive infrastructure costs, good education system and having a stable business environment are among the reasons why Czech Republic is one the most effective locations to outsource your company. Accenture, IBM, Sun Microsystems and Dell have offices in Czech Republic.

Singapore

With regards to purchasing power, Singapore has the second-highest income per capita in the whole planet. This is one of the primary explanations why US companies would rather place their regional headquarters in Singapore; when it comes to technology and work system, Singaporeans have got the say. Terrific educational system, facilities, intellectual property protection and consistent political environment are Singapore's deal to every businessman. HP and Eli Lilly have offices in Singapore too.

Mabuhay! Philippines

It's impossible to ever complain with regards to the hospitality and kindness of the Filipino folks. Philippines is also renowned for being among the finest places to outsource an American business. Excellent English speaking skills, low costs for taxes and compensation and easy adaption of company culture are the main reasons why Philippines is among the best places to outsource. Philippines's existing population is 93 million. Time Warner, Convergys, Chevron-Texaco, Proctor & Gamble, GE services and many others have BPO and IT offices in the Philippines.

There's no harm in outsourcing your Phoenix web design company business, even if you will find political issues that asks every businessman to take back their businesses in the United States. These nations are the few finest in the whole world where you can trust and invest your money in. When you're to choose a country wherein you will be outsourcing your business in, you have to keep in mind that you are not merely giving jobs to an individual, you are also helping their financial state along with the industry you've chosen.
