Web based project management softwares

by Brooke Mueller

Article published on May 17th 2012 | Web Design

When it comes to hectic work schedules, one is willing to accept anything that simplifies the work and turning the business from being the ultimate paperwork disaster to being perfectly organized.

Software is just that. Meant to simplify our work by providing us with the tools that are easy to use and that actually will be used.

Itâ€™s high time we said â€œNOâ€• to the time consuming software/upgrade installation and switch to something that just gets the job done, without you having to learn a complicated and difficult project management tool with too many features.

â€œIt isnâ€™t that they canâ€™t see the solution,

Itâ€™s that they canâ€™t see the problem..â€•

Project Management solutions have a solution to every problem. A browser â€“based project management program that is simple, elegant and easy to use without any complicated software deployment on different computers.

When looking for a complete and all-rounder solution without being distracted and concentrate on the features, Project management solution works in a way that can make a real difference in how you do your work.

And Project management solution is not just for managing software based project. It can be used for variety of other tasks too. Providing us with tools that help us immensely from planning, organizing and managing resources to achieve project goals and objectives. This web based project management software can be accessed through an intranet or WAN/LAN using a web browser without having to install any other software on the system.

Project management solutions, a software so easy of use with access control features (multi-user). From using the management solutions for all types of projects . For e.g.Building a new cluster farm, for issue/bug-tracking, calendar, Gantt charts, email notifications and much more. It supports to manage your projects and spend less time doing it.Impressing any institute, any agency or a large multinational organization by its usability, intuitiveness and breadth.Itâ€™s a handy aid when it becomes difficult to manage those spreadsheets and meet the client expectations at a home based design/ brand business by making it look more professional.

It becomes challenging to hold several meetings only for small updates for the company employees and becomes difficult to communicate between different departments when a company has multiple subdivisions across varied regions.

It is essential when the company working on scores of important projects to speed up interaction and thus, encourage efficient teamwork too. This is where the collaboration feature comes into the picture which helps you to communicate and, work together and get projects done as a team. It being a true blessing in every sense and for everybody from Executives to Project Managers, and employees. Be it portfolio management, shared calendar, resource utilization, automated reports, file attachments, easy searching, comments tracking itâ€™s a one stop solution to all requirements.

By managing workflow it helps to understand how busy any individual is at any given time. With

features like- Project management, Time tracking, Collaboration, HR management, Document management, and Expense tracking it is sure to reduce your workload and bring a smile of relief on your face.
