Get a website of your own up in minutes with DNN Hosting by Alex

Article published on April 9th 2012 | Web Hosting

If you are tired of the same website theme or layout, you need to redesign the site from scratch. However, if you are using DotNetNuke it will be a minuteâ€™s affair. Such is the flexibility that Dotnetnuke Hosting gives to its customers. No doubt, being an open source content management system, DNN is an excellent way to build web sites and web applications on Microsoft platform.

Website building on DNN is not only fast but also it does not require any high technical knowhow. It can do miracles in web development in four ways. First, it is flexible as it can be accustomed as per your needs. Secondly, unlike other open source languages it is far more secure. In addition to this, it is extensible and can be manipulated as per you website needs and design. Last but not the least it is affordable and DNN can be yours at a very attractive price.

Recipe of a successful website is not found under the pillow as a Christmas gift, it has to be earned by burning the midnight oil. However, DNN is one such that is found as a gift to web development. Selecting the right Dotnetnuke Hosting provider is the first step in the process. Hosting providers that can really help you unleash the true potential of Dotnetnuke. When today over seven lakh and counting websites are using Dotnetnuke, it has become the number one website platform these days. A good Dotnetnuke hosting plan will give you the freedom of taking control of all the things through a menu driven interface. With it, one can create his/her own website with the ease of sitting at home and watching TV in munities.

All these DNN Hosting packages generally include webmail facility that has the option of POP3 and IMAP. Besides, you get the hold over the performance of your website. Keep tab on how many people visited your website. In addition to this, DNN hosting support team is there 24 hours, 7 days all year round to help you out if you are in a fix at any point of time. Furthermore, there are lots of web applications that would match to all your web enhancement needs and thus you will have all you want in one place. Website backup every five days is a complimentary service by the DNN hosting providers.

Thus with this you can not only create mesmerizing websites on your own you can also give wings to your imagination and add windows application to the website so that it is not just a simple website it really eases your work as well.
