Article published on March 13th 2012 | Writing

Salt Lamps new information on the use of internet video, up to a lot of this last season that the show's back to cnn money, published in june 2011. "last season, the video made a lot of customer traffic in the beginning, which is composed of 53 percent of all submissions and transfers. In 2015, the video tourists will be more than multiplied by four, two-thirds of web video. "videos today are web-page advertisements in the primary device. Salt Lamps youtube has completely changed the world wide web to post video of it and us, such as advertisement, must accept this. Yes, youtube is on 6th may 2011, and have some incredible information: per-minute, 48 hours of video now downloaded and youtube has surpassed 3 billion visitors a day.

People love the "fun factor" because they grew up with television and movies, which supports the idea that when people look at the screen, they want something to enjoy, not just read articles. In october 2010, forbes is the question many online videos than they did last season, said. Salt Lamps almost 60% of all participants said they would look at the video before examining articles on the same web site. Twenty-two percent said that they often love watching videos more than the study of articles for information about the company. All the professionals at least once a week for three quarters, they saw the company's web business video clips, watch youtube has more than half. "the year 2010 was a very positive season for the digital media industry, described by a recovery in major investment in electronic commerce, creativity and a significant increased need for internet marketing, and an increase in the use of digital content across multiple systems, "said comscore chairman gian fulgoni.
